## Method:

2. Firstly, make sure you have the correct quantities of all the ingredients in advance. You will need to weigh the dandruff, sugar and toe nail clippings carefully.
3. Begin by pouring the pint of sour milk and the 501 grams of dandruff into the cauldron. Use a wooden spoon to gently mix these ingredients together.

4. Next, add the horse hair to the mixture and stir thoroughly for 3 minutes. (There should be no lumps present in the mixture).
5. Gently place the rats' eyeballs into the cauldron, one at a time. These will add texture and flavour to your sandwich filling.
6. After that, add 250 grams of sugar into the mixture to sweeten it. Stir slowly until the mixture becomes a thick paste. You are nearly ready to serve!
7. Lastly, place the 2 slices of stale mouldy bread on a small serving plate. Use a small knife to spread the mixture between the slices.
